- **GitHub:** github.com/SAILESH2508

PROFESSIONAL SUMMARY

Aspiring AI/ML, Data Science, and Generative AI engineer pursuing a B.E. in Computer Science and Engineering, with strong expertise in Python, Django, ML frameworks, and SQL combined with full-stack development skills. Passionate about developing real-world AI-powered solutions and continuously exploring emerging technologies such as GenAI, MLOps, cloud computing, and DevOps to create scalable and future-ready software systems.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science & Engineering Sri Shakthi Institute of Engineering and Technology (SIET), Coimbatore	2023–Present Current GPA: 7.8
Higher Secondary Education (XII) PMG Matriculation Higher Secondary School, Coimbatore	2022 – 2023 Percentage: 70.00%
Secondary School Education (X) PMG Matriculation Higher Secondary School, Coimbatore	2020 – 2021 (Pass)

INTERNSHIP EXPERIENCE

- **Full Stack Development Internship (Prodigy InfoTech)** (Dec 2025 – Jan 2026): Worked on frontend and backend development tasks.
- **Full Stack Development Internship (Code Alpha)** (Oct 2025): Focused on Python Django API development and modular architecture design.
- **Full Stack Development Internship (Arttifai Tech)** (Jul 2025): Involved in UI component optimization and reusable logic integration.
- **UI/UX Design Internship (Arttifai Tech)** (Jul 2025): Specialized in responsive design and high fidelity prototyping using modern tools.

CERTIFICATIONS

- **NPTEL-Python for Data Science (Elite Certificate), IIT Madras** (Jan–Feb 2025): Validated expertise in core Python libraries including Pandas, NumPy, and Scikit learn.
- **Full Stack Development with Python (Xplore IT Corp, Coimbatore)** (Nov 2024 – Jun 2025): Completed comprehensive training on Django frameworks, SQL integration, and web deployment.

HACKATHON PARTICIPATION

- **Smart India Hackathon (SIH) 2025 & 2024:** Engineered robust backend systems using Java Spring Boot.
- **Truth Tell Hackathon 2024:** Developed an AI prototype for misinformation detection using Python scripts.
- **Web3 Hackathon 2025 (Unstop):** Explored decentralized application architecture and smart contracts.

TECHNICAL SKILLS & EXPERTISE

- **Full Stack Development:** Django, Flask, React.js (Frontend), Tkinter (Desktop), HTML, CSS, JavaScript (JS), Bootstrap, SQLite (Database), MongoDB, UI/UX.
- **Programming Languages:** Python, C++, C, Java, PHP.
- **Databases & Data Management:** Database Management System (DBMS), SQLite, MongoDB.
- **Data Analysis/AI:** Matplotlib, Pandas, NumPy, Scikit learn, SciPy, Scikit image, TensorFlow, PyTorch, Data Visualization (Tableau, Power BI), Machine Learning Concepts, Prompt Engineering.
- **Engineering Principles:** Software Engineering, Problem Solving, Data Structures, Git, AWS.
- **Communication Skill**

PROJECTS DONE

1. WEATHERAI – AI POWERED WEATHER PREDICTION SYSTEM

Role: Full Stack Developer & ML Engineer | **Technologies:** Django, React, Machine Learning

- Developed a full stack meteorological prediction system with real time weather insights.
- Built interactive visualization dashboards using Chart.js to display atmospheric data trends.
- Integrated open-source weather APIs for live data ingestion and automated pre-processing.

2. ROAMIQ – TOURIST GUIDE (AI-POWERED WEB APPLICATION)

Role: ML Engineer & Full Stack Developer | **Technologies:** React, Flask, SQLite

- Developed an AI travel assistant for personalized trips based on specific user preferences.
- Integrated predictive models to suggest destinations and optimized itineraries in real time.
- Built a React based frontend for seamless user interaction and planning visualization modules.

3. SENTIMENT ANALYSER (FEATURED)

Role: ML Engineer | **Technologies:** Python, Machine Learning, Flask

- Developed a web app to analyze the sentiment of user input text in real time using NLP.
- Implemented classification models for high accuracy emotion detection in linguistic datasets.
- Designed a clean, interactive UI for visualization of analysis results and confidence scores.

4. PROJECT MANAGEMENT SYSTEM

Role: Full Stack Developer | **Technologies:** Django, Python, SQLite

- Comprehensive project tracking platform with Agile methodologies and smart prioritization.
- Built features for milestone tracking, task assignments, and real time team visualization.
- Optimized backend query performance for retrieval of large datasets using Django ORM logic.

PROJECTS DONE (CONTINUED)

5. EMS PRO – EMPLOYEE MANAGEMENT SYSTEM

Role: Full Stack Developer | **Technologies:** Django, Python, SQLite

- Centralized platform for managing organizational workforce and payroll with a modern dashboard.
- Implemented secure login, attendance-tracking, and dynamic salary slip generation workflows.
- Developed an administrative panel for high level resource management and strategic reporting.

6. SOCIALHUB – MINI SOCIAL MEDIA

Role: Full Stack Developer | **Technologies:** Django, Python, HTML5, CSS3, JS

- Interactive social platform allowing users to share updates, post media, and connect with others.
- Features a modern responsive UI with real time feed updates and user interaction modules.
- Implemented secure user authentication and profile customization for personalized experiences.

7. NEXUS – PREMIUM CHAT APPLICATION

Role: Full Stack Developer | **Technologies:** Django, WebSockets, HTML5, CSS3

- Real time messaging platform utilizing WebSockets for instant bidirectional communication.
- Designed with a modern-glassmorphism interface and secure user authentication protocols.
- Developed group chat functionality with real time notifications and message persistence.

8. COLLEGE PLACEMENT DASHBOARD

Role: Full Stack Developer | **Technologies:** Django, HTML, CSS, SQLite

- Designed a recruitment portal managing student and company records with automated reporting.
- Implemented student side portals for application tracking, profile updates, and interview scheduling.
- Developed analytical tools for placement officers to visualize placement percentages clearly.

9. MARKETING EMPLOYEE ATTENDANCE AND TIME TRACKING SYSTEM

Role: Python Developer | **Technologies:** Python, Tkinter, SQLite, CSV

- Developed a desktop application for offline field employee attendance tracking and reporting.
- Implemented an intuitive Tkinter based GUI with multi user authentication for admin review.
- Designed a persistent SQLite database structure to ensure data integrity during offline usage.

10. EXPENSE TRACKER (FINANCIAL TOOL)

Role: React Developer | **Technologies:** React, HTML, CSS, JavaScript

- Developed a financial tracking application with state managed budgets and categorical filters.
- Used React state management to provide real time updates of spending versus budget goals.
- Integrated simple chart libraries to visualize expenditure trends and savings progress effectively.

INTERESTS AND FUTURE FOCUS

Professional objective is to operate at the intersection of Full Stack Engineering, Artificial Intelligence, and DevOps. Interested in MLOps, focusing on the deployment, automation, and lifecycle management of ML models within scalable DevOps-driven architectures.

- **MLOps & DevOps:** Mastering CI/CD pipelines for AI/ML models, infrastructure automation, and container orchestration using Kubernetes and automation tools.
- **Cloud & Cybersecurity:** Learning secure cloud architecture, secure software development lifecycles, DevSecOps practices, and advanced data encryption techniques.
- **Open-Source Contribution:** Actively engaging with community-driven Python, AI, and DevOps repositories.

LANGUAGES KNOWN

- **Tamil:** Native Proficiency
- **English:** Professional Working Proficiency
- **Malayalam:** Functional (Speaking and Listening)
- **Hindi:** Functional (Reading and Writing)

PERSONAL DETAILS

- **Date of Birth:** 25/08/2005
- **Native Place:** Coimbatore, Tamil Nadu
- **Nationality:** Indian
- **Blood Group:** B Positive
- **Father's Name:** Suresh Kumar G (Asst. Branch Manager, Kotak Life Insurance)
- **Mother's Name:** Rajeswari S (Homemaker)
- **Hobbies:** Competitive Programming, Technical Blogging, Trekking
- **Goals:** To become a Senior Full Stack Architect and lead high impact AI projects.

DECLARATION

I hereby declare that the information furnished above is true to the best of my knowledge and belief.
